

QUESTION	FOCUS AREA (gateway, intermediate, etc)	EXPECTED ANSWER / EXPLANATION
Which BPMN gateway must immediately follow “Product Idea Approved” to start the two major work streams simultaneously?	Gateway	Parallel Gateway (Split/Fork): Tinitiyak nito na ang parehong <i>Software Development</i> at <i>Marketing Campaign Preparation</i> ay magsisimula nang sabay-sabay.
What element is required right before “Launch Product” to ensure both work streams are finished?	Gateway	Parallel Gateway (Join/Merge): Naghihintay ito na makumpleto ang <i>pinakamatagal</i> na stream bago payagan ang "Launch Product."
What is the maximum allowed duration for the “Bug Fixing and Testing” task before the alert is sent?	Event/Constraint	30 days.
How do you model the 30-day deadline without stopping the “Bug Fixing and Testing”	Intermediate Event	A Non-Interrupting Timer Boundary Event na naka-attach sa boundary ng testing task.

QUESTION	FOCUS AREA (gateway, intermediate, etc)	EXPECTED ANSWER / EXPLANATION
task?		
If Software Development takes 60 days and Marketing takes 40 days, when can “Launch Product” start?	Parallel Join	60 days. Kailangang hintayin ang pinakamahabang path.
Can the Marketing stream proceed if the Software Development stream hits the 30-day mark and sends the Red Flag?	Boundary Event	Yes. Ang Non-Interrupting na event ay nagpapagana lang ng parallel na path (Red Flag Notification) ngunit hindi nito kinakansela ang main task o ang Marketing stream.
What happens if the “Bug Fixing and Testing” task finishes in 20 days?	Boundary Event	Ang Non-Interrupting Timer Boundary Event ay kanselado. Hindi na ise-send ang Red Flag Notification.
In BPMN, what is the connection between the Timer Boundary Event and the “Red Flag	Sequence Flow	Isang Sequence Flow (solid line) ang kumokonekta sa boundary event sa simula ng Red Flag

QUESTION	FOCUS AREA (gateway, intermediate, etc)	EXPECTED ANSWER / EXPLANATION
Notification” task?		Notification task.
If the launch date is set for 90 days from the idea approval, what is the maximum slack (extra time) available for the Marketing Campaign Preparation of Software Development takes 60 days?	Path Analysis	30 days ($90 - 60 = 30$ \text{ days}).
What is the immediate preceding step to the “Bug Fixing and Testing” task in a typical software process?	Task	Code Development / Implementation.
QUESTION	FOCUS AREA	EXPLANATION
Which type of gateway allows for one, both, or neither of the	Gateway	Inclusive Gateway (Split/Decision): Nagbibigay-daan ito sa zero, isa, o maramihang

QUESTION	FOCUS AREA (gateway, intermediate, etc)	EXPECTED ANSWER / EXPLANATION
technical/billing investigations to run?		path na mag-activate batay sa kondisyon.
If the complaint is purely technical, how many investigation tasks are activated by the gateway?	Inclusive Split	Isa (Technical Support) lang.
If the complaint involves both technical and billing issues, how many investigation tasks are activated and how do they proceed?	Inclusive Split	Dalawa (Technical Support at Billing Department). Sila ay magpo-proseso nang simultaneously (parallel).
What must follow the investigation tasks to ensure the process waits for all required paths to finish?	Gateway	Inclusive Gateway (Join/Merge): Naghihintay lamang ito sa mga path na na-activate ng naunang split upang matapos.
What BPMN element is needed to model the ability	Intermediate Event	A Non-Interrupting Message Boundary Event na naka-attach sa

QUESTION	FOCUS AREA (gateway, intermediate, etc)	EXPECTED ANSWER / EXPLANATION
to receive a “Customer Email with New Details” while Technical Support is busy?		boundary ng "Technical Support" task.
What task should immediately follow the “Customer Email with New Details” event?	Task/Process	Isang task gaya ng "Update Complaint Record" o "Re-assess Investigation Scope."
QUESTION	FOCUS AREA (gateway, intermediate, etc)	EXPECTED ANSWER / EXPLANATION
Which BPMN element must be used to decide between the two emergency protocols?	Gateway	Exclusive Gateway (XOR Split): Tinitiyak nito na isa lang ang protocol na tatakbo (Mass Casualty OR Facility Lockdown).
What is the event that marks the completion and broadcast of the emergency status?	Intermediate/End Event	A Throwing Signal End Event (o Intermediate Event) para sa "All Clear" status broadcast.
Why is a Signal	Event Type	Ang Signal Event ay

QUESTION	FOCUS AREA (gateway, intermediate, etc)	EXPECTED ANSWER / EXPLANATION
Event the appropriate choice for the “All Clear” status?		ginagamit para sa <i>one-to-many broadcast</i> o pagsenyas sa maraming posibleng tagapakinig (iba pang internal system/department).
Could a Message Event be used instead of a Signal Event for the “All Clear”? Why or why not?	Event Type	No. Ang Message Event ay para sa <i>point-to-point</i> (isang sender sa isang specific receiver). Ang scenario ay nangangailangan ng <i>broadcast</i> .
What type of gateway follows the two protocol tasks?	Gateway	Exclusive Gateway (XOR Merge): Dahil isa lang ang tumakbo, sapat na ang <i>XOR Merge</i> para pagsamahin ang <i>flow</i> .
What task or event does the “All Clear” event immediately follow?	Task	Ang Mass Casualty Protocol task o ang Facility Lockdown Protocol task (alinman sa naisagawa).
What type of information must be provided to the	Data/Condition	Ang Emergency Type and Severity (ang resulta ng naunang

QUESTION	FOCUS AREA (gateway, intermediate, etc)	EXPECTED ANSWER / EXPLANATION
XOR Split gateway?		assessment task).
What is the technical difference between a Signal Throwing Event and a Signal End Event?	End Event	Ang Throwing Signal End Event ay nagpapadala ng signal at agad na tinatapos ang process instance; ang Intermediate Event ay nagpapadala ng signal at nagpapatuloy ang flow.
What happens to the process instance in the Emergency Response Protocol once the “All Clear” Signal is sent (assuming a Signal End Event)?	End Event	Ang process instance ay magtatapos (terminate) agad.

QUESTION	FOCUS AREA (gateway, intermediate, etc)	EXPECTED ANSWER / EXPLANATION
Which type of gateway must be used after “Financial Data Collection” to trigger one, two, or all three departmental reviews?	Gateway	Inclusive Gateway (Split/Decision): Nagbibigay-daan sa isa, dalawa, o lahat ng review tasks na mag-activate batay sa kung sino ang lumampas sa budget.
What is the necessary element to ensure the process waits for all activated departmental reviews to complete?	Gateway	Inclusive Gateway (Join/Merge): Naghihintay ito sa lahat ng activated flows upang matapos.
If only the HR and Sales departments exceeded their budget, how many review tasks are activated, and what happens to the IT Review flow?	Inclusive Gateway	Dalawa ang na-activate (HR at Sales). Ang sequence flow patungo sa IT Review ay hindi na-activate at lalaktawan.
How do you model the 7-day window to start the “Final	Intermediate Event	A Non-Interrupting Timer Boundary Event na naka-attach sa

QUESTION	FOCUS AREA (gateway, intermediate, etc)	EXPECTED ANSWER / EXPLANATION
Budget Report” task?		boundary ng "Final Budget Report" task.
Where must the 7-day Timer Event be placed?	Event Placement	Naka-attach sa boundary ng "Final Budget Report" task.
What happens if the “Final Budget Report” task is not started by the end of Day 7?	Boundary Event	Ang Non-Interrupting Timer Boundary Event expires, na nagti-trigger sa “Late Report Warning” task.
Can the “Final Budget Report” still be started on Day 8, even if the warning has been sent?	Boundary Event	Yes. Ang Non-Interrupting na event ay hindi kinakansela ang main task.
If all three departments need a review, and HR and IT finish on Monday, and Sales finishes on Wednesday, when does the 7-day window begin?	Inclusive Join	Magsisimula ang 7-day window sa Miyerkules (Wednesday), dahil ito ang huling activated review na nakumpleto.
Why is a Service Task	Task Type	Service Task o Send

QUESTION	FOCUS AREA (gateway, intermediate, etc)	EXPECTED ANSWER / EXPLANATION
or Send Task the appropriate type for “Late Report Warning”?		Task. Ang <i>warning</i> ay kailangang <i>i-send nang awtomatiko</i> (automated system action) at hindi manual na gawain ng tao.
What happens to the flow after the “Late Report Warning” task is completed?	Sequence Flow	Ang <i>flow</i> ay <i>magmerge back</i> sa <i>main process</i> (o magtatapos) nang hindi nakakaabala sa <i>Final Budget Report</i> task.

Pool	Tasks	Gateway at Events	Message Flows (InOut)
Customer	Look Over Menu, Call Waiter, Enjoy Meal, Pay Bill, Leave	Start Event (Customer Arrives), End Event (Customer Leaves Satisfied)	\$\rightarrow\$ Order Placement (to Waiter)
